

CASE STUDY

VCLS Achieves Agile Growth and Efficiency with SafetyEasy® Suite's best-in-class PV solution

OUR CUSTOMER

VCLS is leading a mission to expedite access to healthtech products in regulated markets, partnering with Biotech, Pharma and Medtech manufacturers to develop, register and launch innovative products globally. Its team of 300 life sciences professionals worldwide is committed to delivering innovative therapies to patients.

Since 2012, AB Cube's SafetyEasy® Suite has delivered a cost-effective, agile and customer-centric pharmacovigilance management solution for VCLS - with the quality of the system reinforced in a recent full audit.

THE SOLUTION

VCLS was immediately impressed by SafetyEasy® Suite's clear advantages over competing solutions, from its lower operating costs and flexibility to AB Cube's superior compliance expertise and strong customer focus.

The PV team requires minimal user training to start confidently and comfortably using the software. The helpful drop-down menus, pre-identified checks and smooth progression through the system simplifies and speeds case processing, while the comprehensive dashboard enables VCLS to easily report submission KPIs externally to different sponsors filtered on a per study basis - all supported by AB Cube experts.

THE BENEFITS

User-friendly

SafetyEasy® Suite's intuitive system helps VCLS's safety team to quickly achieve qualitative case processing - with minimal training needed to get staff up to speed.

Automated efficiency

VCLS highlights the unique efficiency of the auto-generated narrative templates in SafetyEasy®, which the team uses as a key checklist to ensure the accuracy of its case processing,

Unlimited scalability

The flexible scalability of SafetyEasy® supports VCLS's growth ambitions - providing a solution that meets clients' needs today and easily adapts to higher case volumes.

AT A GLANCE

SafetyEasy® solution

- Pre-validated & compliant
- Automated efficiency
- Scalable continuity
- Flexibility and fine-tuning
